To Whom It May Concern:

Re: Building Reporter Program

The Village of Radium Hot Springs has been using Building Reporter since March 2011.

As the Building Inspector for the Village, I have found that the inspection program provides me with a comprehensive checklist of items to review at each stage of inspection and easily allows me to append photos to the inspection files.

As a new user of Building Reporter, I have been in contact with customer service on several occasions and have found the support and follow up to be excellent. I see the program providing the Village with a good audit trail for all our building inspections.

Yours truly,

Arne Dohlen
Approvals Officer
